CLAIMABLE**
(FOR MALAYSIANS)

Seminar Registration:

WHO SHOULD ATTEND

Oil Palm Industry Supply Chain

- Oil palm plantation owners
(Peatland management & fertilizer optimization)
- Palm Oil Mill Operators
(Agricultural waste-to-energy, POME conversion to biofertilizers, biogas-to-energy, biochar and biomass production)
- Palm Oil Refineries
(Carbon Capture and Storage of refining process, biofuel production)
- Technology Providers
(Precision agriculture, biofertilizer, biogas, biochar and biomass, biofuel and CCS)
- Oil Palm Industry Policy Leaders & Experts

Carbon Market

- International and ASEAN Carbon Market Authorities & Experts
- Malaysian Carbon Policy Leaders and Decision-Makers
- Financial Institutions
- Corporate Net-Zero Pledges
- ESG and Carbon Consulting Experts
- Carbon Project Developers
- Technology Experts & Providers
- International Carbon Compliance Standards/Certification Protocols, Validation & Verification Bodies (VVBs), Carbon Rating Experts
- Compliance and Voluntary Market's Buyers & Traders, and Carbon Exchange Platforms

KEY TAKEAWAYS

Global and Regional Carbon Markets: Gain insights into global and regional carbon market opportunities, including the potential and regulatory frameworks of cross-border carbon trading, enabling ASEAN palm oil players to effectively seize these opportunities.

Upstream Oil Palm Carbon Credits: Learn from success case studies on generating high-quality carbon credits through effective plantation, soil management and fertilizer practices in the upstream oil palm sector.

Downstream Oil Palm Carbon Credits: Explore success case studies on producing carbon credits via innovative downstream oil palm initiatives, such as biomass, biochar, biogas and other waste-to-energy biofuel strategies.
